

Big Pro®

Superior Wall panel for High Performance Buildings

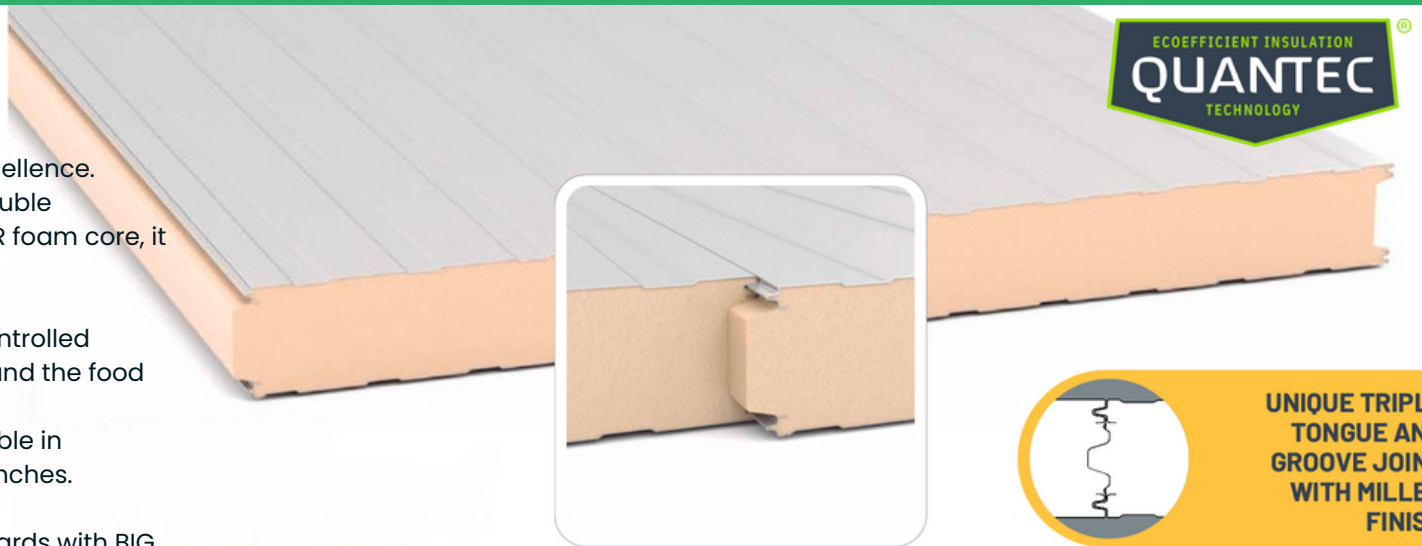

Description

The epitome of cold storage excellence. Featuring an ultra-tight joint, double galvanized steel faces, and a PIR foam core, it ensures superior performance.

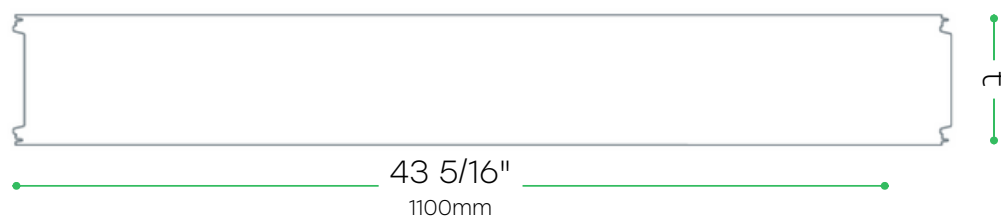

Ideal for walls and ceilings in controlled environments, walk-in coolers, and the food and beverage industry.

FM Mutual approved and available in thicknesses from 1 inch up to 8 inches.

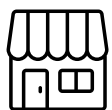

Elevate your cold storage standards with BIG Pro.

Dimensions and R Value

Applications

Retail
Enhance envelope insulation in building walls

Temp Controlled Storage Room
Ensure optimal insulation and R value for maximum effectiveness

Industrial | Distribution Buildings:
Improving Aesthetics, Lowering Costs, and Enhancing Performance

Modular Construction
Simple to install and ready to use for modular buildings

Colors Available

LENGTH
up to 38'

Length

BIG SKIN - OCT 2023

Disclaimer: Please note that all measurements provided in this brochure are originally in international metric units (meters). The conversion to inches has been included for your convenience. While we have made every effort to ensure accurate conversions, please be aware that minor variations may occur due to rounding or specific industry standards. For precision applications, we recommend referring to the original metric measurements.
